Listen

A .dat file is a **data file** that can contain any type of information, such as **text, video, audio, or PDF**. The information in a .dat file is usually specific to the program that created it, but almost any program can create them. .dat files are often created automatically by programs that use the data they contain. ^

Computer program to store specific infor...

.dat files can be found in program folders or as attachments from email servers. They may also accompany other files for configuration, such as DLL (dynamic link library) files. In their original format, .dat files can be unreadable or contain large amounts of data that support a program's various functions. v

You can use an app like DAT Viewer to read, view, and convert .dat files into PDFs. v

हिन्दी में

In English

A DAT file is a **data file** that contains **specific information about the program used to create it**. This file always has the .dat file extension, which is a generic format that can contain any information – video, audio, PDF, and virtually any other type of file. 18 Oct 2021
